

SVENSKA KEMISAMFUNDET
The Swedish Chemical Society

Materials and Interfaces: Smart, Functional, Sustainable?

Annual Surface and Materials Chemistry Symposium

<http://www.asmc.se/>

October 24-26th 2017 Stockholm

Jointly hosted by

KTH Royal Institute of Technology & RISE Research Institutes of Sweden

FORMAMP

featuring the award ceremony of the
AkzoNobel Prize in Surface Chemistry

L'ORÉAL
Research & Innovation

The programme will be inclusive while reflecting surface and materials chemistry at the cutting edge. It will emphasise the scientific diversity of the field in Sweden and balance contributions from Academia, Institutes and Industry.

Sweden is world leading in this area and we have a dynamic and vibrant community; it is more important than ever that we seize the opportunity to get together, renew ties, expose our work to each other, and perhaps even consider our national interests in the discipline.

For students, an **online doctoral course in Surface and Materials Characterisation** will be run after the summer and culminate in the symposium the course is lectured and examined by world renowned **Prof Ralph Nuzzo**.

The symposium will also host a program meeting of the FORMAMP project concerning nano-formulation of antimicrobial peptides.

WELCOME!!!!

Mark Rutland and Karin Persson

On behalf of the organizing committee
